Card game

"Poker player" redirects here. For the magazine, see [Poker Player](#)

A game of

Texas hold 'em in progress. "Hold 'em" is a popular form of poker.

Poker is a family of

comparing card games in which players wager over which hand is best according to that specific game's rules. It is played worldwide, but in some places the rules may vary.

While the earliest known form of the game was played with just 20 cards, today it is usually played with a standard deck, although in countries where short packs are common, it may be played with 32, 40 or 48 cards.[1] Thus poker games vary in deck configuration, the number of cards in play, the number dealt face up or face down, and the number shared by all players, but all have rules that involve one or more rounds of betting.

In most modern poker games, the first round of betting begins with one or more of the players making some form of a forced bet (the blind or ante). In standard poker, each player bets according to the rank they believe their hand is worth as compared to the other players. The action then proceeds clockwise as each player in turn must either match (or "call") the maximum previous bet, or fold, losing the amount bet so far and all further involvement in the hand. A player who matches a bet may also "raise" (increase) the bet. The betting round ends when all players have either called the last bet or folded. If all but one player folds on any round, the remaining player collects the pot without being required to reveal their hand. If more than one player remains in contention after the final betting round, a showdown takes place where the hands are revealed, and the player with the winning hand takes the pot.

With the

exception of initial forced bets, money is only placed into the pot voluntarily by a player who either believes the bet has a positive expected value or who is trying to bluff other players for various strategic reasons. Thus, while the outcome of any particular hand significantly involves chance, the long-run expectations of the players are determined by their actions chosen on the basis of probability, psychology, and game theory.

Poker has increased in popularity since the beginning of the 20th century and has gone from being primarily a recreational activity confined to small groups of enthusiasts to a widely popular activity, both for participants and spectators, including online, with many professional players and multimillion-dollar tournament prizes.[2]

## History [ edit ]

While poker's exact origin is the subject of debate, many game scholars point to the French game Poque and the Persian game As-Nas as possible early inspirations.[3] For example, in the 1937 edition of Foster's Complete Hoyle, R. F. Foster wrote that "the game of poker, as first played in the United States, five cards to each player from a twenty-card pack, is undoubtedly the Persian game of As-Nas." However, in the 1990s the notion that poker is a direct derivative of As-Nas began to be challenged by gaming historians including David Parlett. What is certain, however, is that poker was popularized in the American South in the early 19th century, as gambling riverboats in the Mississippi River and around New Orleans during the 1830s helped spread the game. One early description of poker was played on a steamboat in 1829 is recorded by the English actor, Joe Cowell. The game was played with twenty cards ranking from Ace (high) to Ten (low).[4]

In contrast to this version of poker, seven-card stud only appeared in the middle of the 19th century, and was largely spread by the US military.[5] It became a staple in many casinos following the second world war, and grew in popularity with the advent of the World Series of Poker in the 1970s.[6]

Texas hold 'em and other community card games began to dominate the gambling scenes over the next couple of decades. The televising of poker was a particularly strong influence increasing the popularity of the game during the turn of the millennium, resulting in the poker boom a few years later between 2003 and 2006. Today the game has grown to become an extremely popular pastime worldwide.

## Gameplay [ edit ]

[

Further information on betting rules: Betting in poker

In casual play, the right to deal a hand typically rotates among the players and is marked by a token called a dealer button (or buck). In a casino, a house dealer handles the cards for each hand, but the button (typically a white plastic disk) is rotated clockwise among the players to indicate a nominal dealer to determine the order of betting. The cards are dealt clockwise around the poker table, one at a time.

One or more players are usually required to make forced bets, usually either an ante or a blind bet (sometimes both). The dealer shuffles the cards, the player on the chair to their right cuts, and the dealer deals the appropriate number of cards to the players one at a time, beginning with the player to their left. Cards may be dealt either face-up or face-down, depending on the variant of poker being played. After the initial deal, the first of what may be several betting rounds begins. Between rounds, the players' hands develop in some way, often by being dealt additional cards or replacing cards previously dealt.

At the end of each round, all bets are gathered into the central pot.

At any time

during a betting round, if one player bets, no opponents choose to call (match) the bet, and all opponents instead fold, the hand ends immediately, the bettor is awarded the pot, no cards are required to be shown, and the next hand begins. This is what makes bluffing possible. Bluffing is a primary feature of poker, distinguishing it from other vying games and from other games that use poker hand rankings.

At the end of the

last betting round, if more than one player remains, there is a showdown, in which the players reveal their previously hidden cards and evaluate their hands. The player with the best hand according to the poker variant being played wins the pot. A poker hand comprises five cards; in variants where a player has more than five cards available to them, only the best five-card combination counts. There are 10 different kinds of poker hands, such as straight flush and four of a kind.

## Variants [ edit ]

2006 WSOP Main

Event table

Poker has many variations,[7][8] all following a similar pattern of play[9] and generally using the same hand ranking hierarchy. There are four main families of variants, largely grouped by the protocol of card-dealing and betting:

### Straight A

complete hand is dealt to each player, and players bet in one round, with raising and re-raising allowed. This is the oldest poker family; the root of the game as now played was a game known as Primero, which evolved into the game three-card brag, a very popular gentleman's game around the time of the American Revolutionary War and still enjoyed in the U.K. today. Straight hands of five cards are sometimes used as a final showdown, but poker is almost always played in a more complex form to allow for additional strategy. Stud poker Cards are dealt in a prearranged combination of face-down and face-up rounds, or streets, with a round of betting following each. This is the next-oldest family; as poker progressed from three to five-card hands, they were often dealt one card at a time, either face-down or face-up, with a betting round between each. The most popular stud variant today, seven-card stud, deals two extra cards to each player (three face-down, four face-up) from which they must make the best possible 5-card hand.

Draw poker Five-card draw: A complete hand is dealt to each player, face-down. Then each player must place an ante to the pot. They can then see their cards and bet accordingly. After betting, players can discard up to three cards and take new ones from the top of the deck. Then, another round of betting takes place. Finally, each player must show their cards and the player with the best hand wins.

Community card poker Also known as "flop poker," community card poker is a variation of stud poker. Players are dealt an incomplete hand of face-down cards, and then a number of face-up community cards are dealt to the center of the table, each of which can be used by one or more of the players to make a 5-card hand. Texas hold 'em and Omaha are two well-known variants of the community card family.

There are several

methods for defining the structure of betting during a hand of poker. The three most common structures are known as "fixed-limit," "pot-limit," and "no-limit." In fixed-limit poker, betting and raising must be done by standardized amounts. For instance, if the required bet is X, an initial bettor may only bet X; if a player wishes to raise a bet, they may only raise by X. In pot-limit poker, a player may bet or raise any amount up to the size of the pot. When calculating the maximum raise allowed, all previous bets and calls, including the intending raiser's call, are first added to the pot. The raiser may then raise the previous bet by the full amount of the pot. In no-limit poker, a player may wager their entire betting stack at any point that they are allowed to make a bet. In all games, if a player does not have enough betting chips to fully match a bet, they may go "all-in," allowing them to show down their hand for the number of chips they have remaining.

While typical poker games award the pot to the highest hand as per the standard ranking of poker hands, there are variations where the best hand, and thus the hand awarded the pot, is the lowest-ranked hand instead. In

such games the best hand contains the lowest cards rather than the highest cards; some variations may be further complicated by whether or not hands such as flushes and straights are considered in the hand rankings. There are also games where the highest and lowest hands divide the pot between them, known as "high low split" games.

Other

games that use poker hand rankings may likewise be referred to as poker. Video poker is a single-player video game that functions much like a slot machine; most video poker machines play draw poker, where the player bets, a hand is dealt, and the player can discard and replace cards. Payout is dependent on the hand resulting after the draw and the player's initial bet.

Strip poker is a traditional poker variation where players remove clothing when they lose bets. Since it depends only on the basic mechanic of betting in rounds, strip poker can be played with any form of poker; however, it is usually based on simple variants with few betting rounds, like five card draw.

Another

game with the poker name, but with a vastly different mode of play, is called Acey-Deucey or Red Dog poker. This game is more similar to Blackjack in its layout and betting; each player bets against the house, and then is dealt two cards. For the player to win, the third card dealt (after an opportunity to raise the bet) must have a value in-between the first two. Payout is based on the odds that this is possible, based on the difference in values of the first two cards. Other poker-like games played at casinos against the house include three card poker and pai gow poker.

Computer

programs [ edit ]

A variety of computer poker players have been developed by researchers at the University of Alberta, Carnegie Mellon University, and the University of Auckland amongst others.

In a January 2024 article[10] published in

Science, a group of researchers mostly from the University of Alberta announced that they "essentially weakly solved" heads-up limit Texas Hold 'em with their development of their Cepheus poker bot. The authors claimed that Cepheus would lose at most 0.001 big blinds per game on average against its worst-case opponent, and the strategy is thus so "close to optimal" that "it can't be beaten with statistical significance within a lifetime of human poker playing." [11]

## dicas aviator mr jack

An ace can be the lowest card of a straight (ace, 2, 3, 4, 5) or the highest card of a straight (ten, jack, queen, king, ace), but a straight can't "wrap around"; a hand with queen, king, ace, 2, 3 would be worthless (unless it's a flush).

## **dicas aviator mr jack :x bet brasil**

Era para ser uma das aeronaves mais avançadas de dicas aviator mr jack época, enviando a ameaça dos bombardeiros nucleares soviéticos e tornando o Canadá um líder mundial dicas aviator mr jack aviação militar.

A flecha Avro, também conhecida como CF-105, tinha muito descanso dicas aviator mr jack suas asas.

No entanto, o sonho se transformou dicas aviator mr jack um pesadelo quando a aeronave foi cancelada menos de 1 ano após seu primeiro voo e bem antes do início da operação.

Até hoje, 65 anos depois o Avro Arrow continua sendo um dos maiores arrependimentos coletivo do Canadá e ainda alimenta a fala pública. Documentos recentemente revelado deram alguma luz sobre exatamente como aconteceu com esse projeto condenado".

"Esta aeronave era completamente canadense", diz Richard Mayne, historiador-chefe da Força Aérea Real Canadense e os marcadores de desempenho durante seu desenvolvimento mostraram muito que ela estava pelo menos a par com o design mais avançado do momento." "Quando foi cancelado, esse era um dos momentos do Canadá 'e se'", acrescenta ele. "O Arqueiro ainda tem controle sobre nossa psique nacional."

A flecha de Avro foi uma resposta direta à ameaça percebida da União Soviética, após o fim do II Guerra Mundial. bombardeiros capazes para sobrevoar a Ártico e chegar América com carga nuclear

"A Força Aérea Real Canadense colocou um requisito dicas aviator mr jack 1952 para uma interceptadora capaz de velocidade Mach 2 e altitudes 50 mil pés", disse Mayne à dicas aviator mr jack .

"Eles precisavam de algo rápido que tivesse o alcance e a altitude para interceptar esses bombardeiros soviéticos, tanto ao norte quanto possível", disse ele.

A Avro Canada, fabricante de aeronaves Avignon Canadá tinha acabado com sucesso colocar dicas aviator mr jack serviço o CF-100 Canuck um caça bijet versátil projetado e construído no país.

Era um plano ambicioso que veio dicas aviator mr jack momento significativo para o Canadá. "O país emergiu da Segunda Guerra Mundial como um grande jogador", diz Mayne. "Tivemos a terceira maior marinha do mundo, o quarto melhor força aérea mas cidadania canadense não existia até 1947 - Canadá tinha acabado de chegar à idade."

O desenvolvimento começou dicas aviator mr jack 1955, e no tempo recorde o primeiro Arrow foi lançado ao público a 4 de Outubro 1957 - mesmo dia do lançamento da Sputnik I.

"Foi uma coincidência", diz Mayne, mas horrível porque o Sputnik demonstrou que você poderia colocar um carregamento nuclear no foguete e colocá-lo dicas aviator mr jack órbita. E a Arrow não seria capaz de fazer nada sobre mísseis balísticos intercontinentais."

Projetado para uma tripulação de dois e ostentando um design "delta" asa, a Arrow tinha pouco menos do que 78 pés com asas 50 metros (50), tornando-se comparativamente maior tanto o seu antecessor CF 100 Canuck quanto Phantom F4, avião americano dominante dicas aviator mr jack serviço desde 1961.

Ele voou pela primeira vez dicas aviador mr jack 25 de março, 1958 mas nessa época Mayne diz que pensadores estratégicos e políticos já acreditavam no mundo ter entrado num cenário bélico "botão push", onde a ameaça nuclear era restrita aos mísseis do longo alcance.

"Isso acabou sendo falso, porque a ameaça do bombardeiro continuou e continua até hoje", diz Mayne.

O avião tinha perdido relevância, e os custos de balão do projeto com a mudança no clima político fizeram o resto.

Em 29 de fevereiro, 1959 o primeiro-ministro John Diefenbaker cancelou a programação e dicas aviador mr jack poucas semanas os cinco aviões que haviam sido construídos foram destruídos por medo da espionagem soviética. Como resultado milhares dos empregos perdidos acabaram desmoronando completamente no Canadá Avro ndia

"Se o Reino Unido tivesse comprado algumas flechas, isso poderia ter salvado a programação", diz Mayne.

"Mas sem contratos estrangeiros, nosso país era pequeno demais para suportar uma tecnologia tão avançada. Estábamos atirando nas estrelas irônico porque muitos engenheiros da Avro depois foram à NASA e ajudaram com o programa Apollo."

Rumores e mitos imediatamente começaram a girar dicas aviador mr jack torno das razões para o cancelamento abrupta do programa, alguns dos quais persistem até hoje.

"A aeronave assumiu quase uma posição mitológica no Canadá", diz Alan Barnes, um membro sênior da Universidade Carleton de Ottawa que analisou o papel desempenhado pela inteligência na decisão para parar a evolução do avião.

Um conjunto de mitos, segundo Barnes essencialmente culpa os Estados Unidos por enganar o Canadá sobre a ameaça soviética dicas aviador mr jack mudança - supostamente porque eles não queriam que ele produzisse uma aeronave melhor doque as americanas.

Outro diz que analistas de inteligência canadenses deliberadamente interpretaram mal as informações para apoiar uma decisão essencialmente tomada pelo governo, fornecendo-lhe desculpas.

"Mas tudo isso foi especulação, como ninguém tinha realmente visto os relatórios de inteligência", diz ele.

Mas dicas aviador mr jack 2024, Barnes publicou um artigo sobre esses relatórios depois de recuperar documentos que mostram uma ligação clara entre a inteligência e como ela foi usada pelos responsáveis na época.

"No início, a força aérea realmente não prestava atenção à inteligência", disse ele.

"Eles decidiram que queriam um novo avião grande e sofisticado, então eles vieram com todos os requisitos operacionais dicas aviador mr jack larga medida isolados sem realmente prestar atenção ao o relatório estava dizendo."

No final dos anos 1950, acrescenta ele. a seta da flecha estava ficando muito cara e bastante atrasada."

"A inteligência canadense produziu uma avaliação de alta qualidade no início do 1958, dizendo que a ameaça dos bombardeiros não era nem um pouco tão séria quanto se pensava anteriormente e os soviéticos estavam construindo forças maciçamente poderosas para construir mísseis", diz Barnes.

A implicação política era que, se uma ameaça estava sendo reduzida havia muito pouca razão para gastar tanto dinheiro dicas aviador mr jack um avião e não seria capaz de lidar com os mísseis balísticos.

"No verão de 1958, o Comitê Chefes do Estado Maior havia chegado à conclusão que não poderia mais recomendar continuar com a programação mas na época eles já estavam sem querer cancelar por causa dos impactos políticos", diz Barnes.

"Eles meio que atrasaram as coisas para o início de 1959, quando ainda era visto publicamente como um desastre da indústria canadense e também escândalo político. O governo fez tudo aquilo a fazer mas explodiu na cara deles; perderam uma eleição alguns anos depois até certo ponto sobre estas questões defensivas."

Segundo Barnes, a aeronave nunca foi tão boa quanto as pessoas fizeram.

"Foi cancelado na hora certa para manter esse tipo de mitologia", diz ele.

"Nunca voou com nenhum dos seus armamentos e os motores reais que foi projetado para usar. Tudo era potencial, então muitos canadenses ainda podem fingir ser a melhor aeronave do mundo."

Em 1997, a CBC (Canadian Broadcasting Corporation) encomendou uma minissérie de TV sobre o avião intitulado "The Arrow" estrelado por Dan Aykroyd como Crawford Gordon, presidente da Avro Canada. Um modelo dicas aviador mr jack tamanho real do aparelho foi construído para produção e está atualmente nos arquivos do Reynolds Museum na cidade canadense Wetaskiwin Alberta

Outro modelo, feito de alumínio da categoria aeronave-grau está dicas aviador mr jack exposição no Aeroporto Edenvale perto Muskoka (Ontário). Um terceiro Modelo - cerca do tamanho dois terços um Arrow real - é construído na Springbank Airport Calgary. Mas este destina a voar realmente. É o projeto paixão por uma equipe que estão esperando para levá-lo aos céus até 2026!

Embora nenhum dos Arrows tenha sobrevivido intacto, o cockpit original e a engrenagem do nariz de um deles bem como partes das asas estão dicas aviador mr jack exibição no Museu da Aviação Canadense.

Talvez a indicação mais forte da obsessão do Canadá com o Arqueiro veio dicas aviador mr jack 2024, quando depois de um ano pesquisando, modelos afundados foram recuperados no fundo dos lagos Ontário. Os modelos eram disparados pelo lago como parte das provas nos voos realizados na metade anos 1950 e vários grupos já os procuravam antes sem sucesso".

O empreendimento foi financiado fora do bolso por John Burzynski, um empresário de mineração canadense.

"O significado de encontrar os modelos está dicas aviador mr jack lembrar aos canadenses do grande esforço que foi feito para projetar, testar e construir uma aeronave tecnológica avançada", diz Burzynski. Entre as peças descobertas estava um dos primeiros testes substancialmente intactos no Museu Canadense da Aviação & Espaço (Aviação canadense) na cidade Ottawa."

Falando da importância e do papel de Arqueiro na história canadense, Burzynski diz que tudo era possível para a geração após o fim dos anos 80.

"O esforço maciço que entrou no programa Arrow foi essencialmente um exercício ao vivo, mostrando tudo é possível quando o suficiente de empenho e engenhosidade são aplicados a algum problema", diz ele.

"Para muitos parece que este teria sido um ponto de inflexão para o Canadá desenvolver tanto ar vigoroso quanto possivelmente até mesmo programa espacial, se não tivesse sido abruptamente cancelado."
